Researching the rise of social media interfaces motivated me to pursue full stack development and software engineering. I'm seeking a fulfilling web developer position where I can continue to learn and implement creative JavaScript programs or branch into more object-oriented languages.

Skills

Python	HTML5	Git	jQuery	Express	Test-Driven Development	React.js
JavaScript	CSS3	Linux	Node.js	PostgreSQL	Spanish bilingual proficiency	AWS/EC2

Projects

Airspace App - GitHub - In Progress
August 2017
- Built with Node.js, Express, WebSockets, jQuery, JavaScript, HTML/CSS.
- Implemented audience response platform that allows users to provide feedback and answer a host user's questions in real time.

BioLingual App - GitHub - Demo
July 2017
- Built with JavaScript, jQuery, HTML/CSS, Adobe Illustrator.
- Designed and created interactive anatomy map that translates the names of body parts and commonly associated symptoms using ApiMedic and the Google Translate API.

Experience

Contributing Writer at Code Like a Girl
July 2017 – Present
- Chronicles experiences with logical problem-solving in computer science and learning new web technologies at medium.com/@nat_ventura.
- Provides weekly updates relating to full stack development projects.

Research Fellow at Oberlin College
June 2015 – May 2017
- Conducted an independent research project examining social media governance and user activism.
- Tracked the circulation of police brutality videos on Facebook and Twitter as case studies using Keyhole.

Education

DigitalCrafts
June 2017 – October 2017
Immersive Coding Bootcamp
- Sixteen-week full-time accelerated learning program.
- Curriculum covers Node.js, PostgreSQL, Express, React.js, HTML5, CSS3, and Amazon Web Services.

Oberlin College
August 2013 – May 2017
Creative Writing, Bachelor of Arts
